Beschreibung

Description:

Squalene lowers cholesterol levels in the blood. Laboratory tests have confirmed the cholesterol-lowering properties of squalene and have also led pharmacologists to add statin drugs to squalene.

Squalene in skin diseases: UV-B radiation is a source of free radicals and potential skin damage such as skin cancer (melanoma), other possible consequences are suppression of the immune system and allergies. Squalene protects the skin from premature aging and effectively combats the free radicals caused by the sun's UV radiation.
